Figure 6

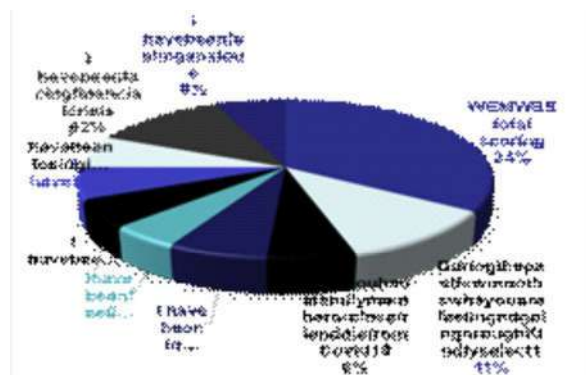

Share of Adults in Households with Children Under the Age of 18 Who Report Symptoms of Anxiety and/or Depressive Disorder During the COVID-19 Pandemic, by Gender

NOTES: *Indicates a statistically significant difference between women in households with children under the age of 18 and men in households with children under the age of 18 at the 95% level. These women and men report the least symptoms of anxiety and/or depressive disorder that occurred more than half the time in nearly every day. Data shown is for December 9 - 21, 2020.
